SINGLE-PHASE STANDARD ENERGY METER

this single standard energy meter which can calibrate energy meter as a standard energy meter is a new generation electronic energy meter which introduces 90's international advanced technology and equipment. It is used in the electric department and the measure department comprehensively.

Accuracy class	0.05/0.1/0.2class
Rated voltage	220V (240V)
Rated current	5A
Rated frequency	50Hz (60Hz) ± 2Hz
Energy impulse progression display	6bit
Output energy impulse	TTL
Strobe impulse	TTL
Energy constant	F _H : 36×10 ⁶ P/kWh F _L : 3600P/kWh
Working power	220V ± 10% 50Hz
Size	285×215×100mm
Weight	3kg
