THREE-PHASE DIGITAL POWER METER

DSP digital sampling processing technique

Testing automatic compensating technique

Can suffice for requirement of high-accuracy measuring for various electronic parameters at the same time

Test: V, A, W, Var, VA, Watthour, Varhour, F, PF, ϕ

Output active/reactive energy impulse

function of RS232 communications control

Accuracy class	0.02/0.05class
Input voltage	3×440/600 VY/?
Rated current	5A
Input current	3×1/10A (HC 3002) 3×1/10/100A (HC 3100)
Input frequency	40-70Hz
Display digit	6 bit
Temperature influence	max 10PPm Per degree
