

SINGLE-PHASE & POLY-PHASE METER TEST EQUIPMENT

Output current: 0.1A--40A (programmable)

Output voltage: 100V, 220V, 380V

Pulse counter

Creeping test on induction or electronic meters' running and sensibility.

Pulse number can be set from 1 to 9999.
Test stops when pulse number is the defined one.

Meter position: 24--160 meters.

With PWM modulation amplifier,
the equipment offers
large power output,
high reliability and stability.
